SAGE

Welcome.

Welcome to the 2013 Criminology catalogue. In the following pages you will find details of SAGE's exciting new publications as well as our classic and bestselling titles.

We are delighted to be able to present a fantastic range of texts to support students at every stage of their degree, from introductory textbooks such as Richard Jones' new **An Introduction to Theoretical Criminology** right through to higher-level titles including a new edition of Cavadino, Dignan and Mair's **The Penal System Fifth Edition**, and books that students can use throughout their entire degree and beyond such as McLaughlin & Muncie's **Criminological Perspectives Third Edition**.

You will also find details of our new reference works and information on our field-leading journals, as well as our most up-to-date collection of research methods and study skills texts.

SAGE is internationally renowned for our carefully-curated, high-quality, award-winning reference programme and we are proud to present the following new major reference works: David Wall's **Cybercrime** and Katja Franko Aas' **Globalization & Crime**.

We hope you enjoy the range of books within and would love to receive your feedback - contact details can be found on the page opposite. If you would like to discuss writing a book for SAGE please contact our Editor, Natalie Aguilera.

This catalogue includes only our most recent and popular titles so if you can't find what you're looking for, or if you are interested in learning more about forthcoming titles, please visit our website at www.sagepub.co.uk where you can find full details of all of our books, journals and electronic products. You can sign-up for new product alerts to keep you up-to-date with our latest books, and table of contents alerts so you are informed of new journal issues as soon as they publish. We hope you will enjoy reading our books and journals throughout 2013 and beyond.

THE SAGE DICTIONARY OF CRIMINOLOGY

Third Edition

Edited by Eugene McLaughlin University of Southampton and John Muncie The Open University

With the publication of the third edition of this work Eugene McLaughlin and John Muncie have consolidated their position as criminology's lexicographers. This thoughtful compilation will allow students to enhance their appreciation of the discipline's boundaries while at the same time sharpening their critical faculties so that they can redraw them

- Ian O'Donnell, Professor of Criminology, University College Dublin

Now in its Third Edition, this bestselling reference text has established itself as the authoritative source covering the key concepts, theories, and methods in criminology and criminal justice. Edited by two of the leading figures in the field, the book is:

- comprehensive: with now over 300 entries, the third edition has been updated to include new entries and an expanded editorial introduction
- definitive: concepts are precisely defined so students have a clear understanding of the history and development of each topic and debate
- student-focused: each entry maps connections across various fields and issues and includes further reading to extend students' knowledge throughout their studies
- international: contributions from internationally renowned academics and practitioners ensure that this book is global and comparative throughout.

This wide-ranging reference and research tool will be an essential companion for students and academics within criminology, criminal justice and legal studies and related fields including sociology, social policy, psychology and cultural studies.

CRIMINOLOGICAL PERSPECTIVES

Essential Readings

Third Edition

Edited by *Eugene McLaughlin* University of Southampton
and *John Muncie* The Open University

This revised and expanded **Third Edition** of the internationally acclaimed **Criminological Perspectives** is the most comprehensive reader available in the field. In addition to including essays which have had a seminal influence on the development of criminology, the book reflects on the range of criminological thinking in the twenty-first century. Wide-ranging and global in scope and coverage, this text will enable students to engage with the key concepts, theoretical debates and empirical issues that they'll encounter throughout their studies. New articles have been included to cover topics of contemporary criminological significance, including:

- surveillance
- digitized crime
- terrorism and political violence
- environmental crime
- human trafficking
- techno-social networks
- narco-crime
- global inequalities.

The 56 articles are organised thematically, complete with introductions that place them in context and to illustrate the approaches taken by different schools of criminological thought.

CRIMINOLOGY

The Essentials

Second Edition
James Treadwell
University of Birmingham

Criminology recruits undergraduate students from all sorts of backgrounds. As they enter their first year they confront a dauntingly complex and diverse discipline. Therefore, a no-nonsense basic primer is an essential survival tool. For me, Treadwell's book, which covers everything from underlying philosophical principles to exam tips, is the most comprehensive and accessible basic primer on the market - **Steve Hall, Professor of Criminology, Teesside University**

This is an essential introduction to undergraduate studies in criminology. Short, clear and concise, it provides a comprehensive overview of the key themes covered on a criminology course. The **Second Edition** provides:

- Summaries of key course content, including new sections on race and ethnicity, cybercrime, ordinary crime, state crime, global and comparative criminology, green criminology and zemiology
- A helpful study skills section with extensive advice on how to write essays and pass exams, including new sections on how to avoid plagiarism and how to find, read and use journal articles
- Recent international case studies drawn from the United Kingdom, Australia, Africa and The United States
- An all new companion website providing guides to further reading and links to relevant blogs, journal articles and useful websites.

Criminology: The Essentials is an indispensable learning tool. As well as mapping out course content in a coherent and engaging way, it offers students helpful hints and tips for getting the most out of their studies.

INTRODUCTION TO CRIMINOLOGY

California State University, San Bernardino, USA

Discussing all the major topics, this book focuses on theories that have been validated by current research. To enhance that perspective in the book, examples of street crime are integrated into the theory chapters. In addition, the text provides more detail on contemporary, mainstream ideas that are becoming more prevalent in modern criminology literature, such as developmental/life-course theories and biosocial perspectives.

Introduction to Criminology discusses issues of diversity in each chapter. Transnational comparisons regarding crime rates and the way other countries deal with crime make the text ideal for courses that take a worldwide approach to criminology.

How Academics and their Research Make a Difference

Patrick Dunleavy, Simon Bastow and Jane Tinkler all at The London School of Economics and Political Science

The impact agenda is set to shape the way in which social scientists prioritise the work they choose to pursue, the research methods they use and how they publish their findings over the coming decade, but how much is currently known about how social science research has made a mark on society?

Based on a three year research project studying the impact of 360 UK-based academics on business, government and civil society sectors, this groundbreaking new book undertakes the most thorough analysis yet of how academic research in the social sciences achieves public policy impacts, contributes to economic prosperity, and informs public understanding of policy issues as well as economic and social changes. **The Impact of the Social Sciences** addresses and engages with key issues, including:

- Identifying ways to conceptualise and model impact in the social sciences
- Developing more sophisticated ways to measure academic and external impacts of social science research
- Explaining how impacts from individual academics, research units and universities can be improved.

Essential reading for researchers, academics and anyone involved in discussions about how to improve the value and impact of funded research.

STATISTICS FOR CRIMINAL JUSTICE AND CRIMINOLOGY IN PRACTICE AND RESEARCH

An Introduction

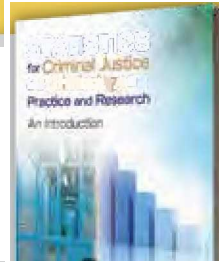

Jack Fitzgerald and Jerry Fitzgerald

An engaging introduction to the study of basic statistics for students pursuing careers as practitioners or researchers, this student-friendly text shows how to calculate a variety of descriptive and inferential statistics, recognize which statistics are appropriate for particular data analysis situations, and perform hypothesis tests using inferential statistics.

Much more than a 'cook book', it encourages readers to think critically about the strengths and limitations of the statistics they are calculating, as well as how they may be misapplied and misleading. Examples of statistics and statistical analyses are drawn from the worlds of the practitioner as well as the policymaker and researcher. Students will also gain a clear understanding of major ethical issues in conducting statistical analyses and reporting results, as well as insight into the realities of the life of researchers and practitioners as they use statistics and statistical analyses in their day-to-day activities.

AN INTRODUCTION TO THEORETICAL CRIMINOLOGY

Richard Jones University of Edinburgh

Spanning a diverse range of criminological theories old and new, **An Introduction to Theoretical Criminology** provides a complete overview of the key theories and concepts that students will come across throughout their studies.

From the Chicago School's social disorganisation theory to desistance theories, situational action theory and cultural criminology, this book offers a chronological overview tracing the development of criminological theory. It includes:

- a detailed account of the history of criminology
- coverage of the key criminological theories, including; learning theories; strain theory and subcultural theories; labelling theory; critical criminology; control theory; feminist criminology; opportunity theories and psychological theories
- useful chapter overviews, learning objectives, self-test questions, glossaries of key theories, terms and criminologists and breakout boxes flagging up key points
- a full Companion Website complete with tutor's notes, presentation slides, case studies, video clips, web links, downloadable MP3 recordings of archive material and links to relevant journal articles.

Comprehensive, accessible and engaging, **An Introduction to Theoretical Criminology** is essential reading, skilfully tying together the key areas of criminological theory into a neat package that will support students throughout their studies in criminology.

Steve Hall uses cutting-edge philosophy and social theory to analyze empirical work on patterns of crime and illuminate contemporary criminological issues. He provides a fresh, relevant critique of the philosophical and political underpinnings of criminological theory and the theoretical canon's development

during the 20th century. The book evocatively explores the changing patterns of harm, the adoption and abandonment of specific social theories within criminology and the application of new continental philosophy to the criminological problem.	4 p a g e s C l o t h (9 7 8 - 1 - 8 4 8 6 0 - 6 7 1 - 5) . £ 7 5 . 0 0 P a p e r (9 7 8 - 1 - 8 4 8 6 0 - 6 7 2 - 2) . £ 2 4 . 9 9

Second Edition

**Steven M Cox and William P
McCamey** both at *Western Illinois
University, USA*, and **Gene L
Scaramella** *Ellis University, USA*

Focusing on the thought-provoking, contemporary issues that underscore the challenging world of policing, this easy-to-understand text balances theory, research and practice to give students a comprehensive overview of both the foundations of policing and the expanded role of today's police officers. The engaging writing style and stories from the field, coupled with unique coverage of the issues of policing in multicultural communities and the impact of globalization on policing, make this book a must-have for policing courses.

GLOBAL POLICING

Ben Bowling *King's College
London* and **James Sheptycki**
York University, Toronto, Canada

Global Policing shows how security threats have been constructed by powerful actors to justify the creation of a new global policing architecture and how the subculture of policing shapes the world system. Demonstrating how a theory of global policing is central to understanding global governance, the text explores:

- the 'new security agenda' focused on serious organised crime and terrorism and how this is transforming policing
- the creation of global organisations such as Interpol, regional entities such as Europol and national policing agencies with a transnational reach
- the subculture of the 'global cops', blurring boundaries between police, private security, military and secret intelligence agencies
- the reality of transnational policing on the ground, its effectiveness, legitimacy, accountability and future development.

LAW ENFORCEMENT ETHICS

NEW!

Classic and Contemporary Issues

Edited by Brian D Fitch

Law Enforcement Ethics is at the forefront of engaging in the conversation about the future of law enforcement ethics, while examining many of the classic, enduring challenges posed by the profession itself. The conversation explores a host of foundational issues that include: who should be hired as a law enforcement officer; what training should look like during the basic academy, as well as over the span of one's career; common ethical challenges, such as force and interrogations; what an ethical promotional process should entail; international best practices and problems; psychology of marginality; role of the media in promoting accountability; and the roles played by social learning, sub-culture, organizational policies and PTSD in misconduct.

CRIMINAL & BEHAVIORAL PROFILING

Curt R Bartol *Glenville, New York, USA*, and Anne M Bartol

Criminal and Behavioral Profiling, written by well-established authors Curt and Anne Bartol, presents a realistic and empirically based look at the theory, research and practice of modern criminal profiling, or, as it is more professionally termed, behavioural analysis or behavioural investigative analysis. Designed for use in a variety of criminal justice and psychology courses, the book delves into the process of identifying distinctive behavioural tendencies, geographical locations, demographic, and biographical descriptors of offenders, and personality traits, based on characteristics of the crime. Timely literature and case studies from the rapidly growing international research in criminal profiling help students understand the best practices, major pitfalls and psychological concepts that are key to this process.

James C *Mark Cieslik University of Northumbria and Donald Simpson Teesside University*

A current textbook America, interest to and, in d to work w manage ; in schola
What is youth? HOW do we understand youth in its social and cultural context? In this timely and sought-after title, the authors provide a concise and readily accessible introduction to the interdisciplinary field of youth studies. Drawing upon the latest research and developments in the field, as well as discussing the fundamental ideas underlying the disciplines as a whole, they offer a comprehensive yet unpacked understanding of youth as a social phenomenon. Illuminating the many abstract and contested concepts within youth studies, the book offers explanations to questions such as:
• how might we define youth?
• how can we understand young people in relation to their social identities and practices?
• what is the relationship between youth and social class?
• how do youth cultures develop?
• how can we understand youth in a globalized perspective?

Crime & Social Order / White Collar Crime

1 an introduction to social

policy

Edited by Peter Dwyer and Sandra Shaw both at Salford University

Exploring the essential topics, themes and issues that students study:

- part one examines the key concepts which make up the foundation of social policy, looking at welfare, social justice and diversity
- part two explores the impact of policy at all different stages throughout the life course
- part three takes a comparative perspective, discussing the international issues and supranational bodies that impact on British and European social policy today.

The concise chapters define the key terms and outline the key debates, giving students a fundamental foundation for their degree.

Chapter overviews and summaries guide readers through the book, and questions for reflection conclude each chapter to test

readers' knowledge.

A Psychosocial Approach

Second Edition

Wendy Hollway Open University
and **Tony Jefferson** John Jay
College of Criminal Justice, USA

Wendy Hollway and Tony Jefferson have

updated their groundbreaking book for students and researchers looking to do qualitative research differently. The new edition critically reviews many of the assumptions, claims and methods of qualitative research and also acts as a 'how-to' guide to the method the authors call the 'free association narrative interview'.

CONTENTS

The Need to Do Research Differently / Researching the Fear of Crime / Producing Data with Defended Subjects / Analyzing Data with Defended Subjects / The Ethics of Researching Psychosocial Subjects / Biography, Demography and Generalizability / A Psychosocial Case Study / Original Afterword / New Developments since 2000

THE SAGE HANDBOOK OF CRIMINOLOGICAL RESEARCH METHODS

Edited by David Gadd *University of Manchester*, Susanne Karstedt *University of Leeds* and Steven F Messner *State University of New York at Albany, USA*

The **SAGE Handbook of Criminological Research Methods** focuses on the application of 'methods' to address the core substantive questions that currently motivate contemporary criminological research. It maps a canon of methods that are more elaborated than in most other fields of social science, and the intellectual terrain of research problems with which criminologists are routinely confronted.

This remarkable collection of essays is criminological methodology like it ought to be

GLOBALIZATION AND CRIME

Three-Volume Set
Edited by Katja Franko Aas *University of Oslo, Norway*

This new major work shines a spotlight on key criminological themes in the study of transnationalism and globalization, and, through a selection of the established literature on the subject along with more contemporary writing, explores how globalization is defined, researched and debated within criminology. In order to do this, the set is broken down into three volumes:

Volume One: Concept and Its History

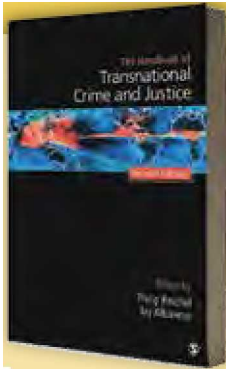

Volume Two: Transnational Crime and Crime Policy

Volume Three: Methodologies and New Directions

The three-volume structure enables comprehensive coverage of the historic development of the concept, its key definitional and methodological issues, ample case studies as well as theoretical and normative academic debates. Each volume is framed by its own newly written introduction which places the selection of articles in context, making this set a truly valuable resource for scholars in the field.

THE SAGE ENCYCLOPEDIA OF TERRORISM

Second Edition

Edited by **Gus Martin** California State University, Dominguez Hills, USA

The **SAGE Encyclopedia of Terrorism, Second Edition** is a thoroughly updated and expanded edition of the original, highly regarded reference work. Nearly 100,000

words of new material has been added, along with fully updated original entries, expanded coverage and multimedia elements (audio and video clips, links to primary documents and more) accompany the electronic version. New entries explore the impact of terrorism on economics, public health, religion and even pop culture. Ethical issues such as the role of torture in interrogations, competing notions of security versus liberty and the debates over the Foreign Intelligence Surveillance Act legislation and Guantanamo Bay are also covered. Two dozen entries on significant recent events - such as the London bombings, Chechen attacks on Russian interests and the rescue of Ingrid Bettancourt - and some 60 additional new entries will restore the work as an up-to-the-minute, natural first-stop for researchers.

ENCYCLOPEDIA OF COMMUNITY CORRECTIONS

Edited by **Shannon M Barton-Bellessa** Indiana State University, USA

Community corrections has evolved in the last 40 years to become a substantial part of the criminal justice and correctional system, spurred in recent years not so much by a progressive, humane philosophy as by dramatically increasing prison populations, court orders to 'fix' over-extended prison settings and an economic search for cost savings. To date, no comprehensive reference resource has tackled this topic. The one-volume **Encyclopedia of Community Corrections** explores all aspects of community corrections, from its philosophical foundations to its current inception.

ENCYCLOPEDIA OF STREET CRIME IN AMERICA

Edited by **Jeffrey Ian Ross** University of Baltimore, USA

Anyone living or working in a city has feared or experienced street crime at one time or another, whether it be a mugging, purse snatching or a more violent crime. In the United States, street crime has recently hovered near historic lows; hence, the declaration of certain analysts that street life in America has never been safer. But is it really? Street crime has changed over past decades, especially with the advent of surveillance cameras in public places - the territory of the street criminal - but at the same time, criminals have found ways to adapt. This encyclopedic reference focuses primarily on urban lifestyle and its associated crimes, ranging from burglary to drug peddling to murder to new, more sophisticated forms of street crime and scams. This traditional A-to-Z reference has significant coverage of police and courts and other criminal justice subdisciplines while also featuring thematic articles on the sociology of street crime.

THE SOCIAL HISTORY OF CRIME AND PUNISHMENT IN AMERICA

An Encyclopedia

Edited by **Wilbur R Miller** State University of New York at Stony Brook, USA

Several encyclopedias overview the

contemporary system of criminal justice in America, but full understanding of current social problems and contemporary strategies to deal with them can come only with clear appreciation of the historical underpinnings of those problems. This four-volume work surveys the history and philosophy of crime, punishment and criminal justice institutions in America from colonial times to the present. It covers the whole of the criminal justice system, from crimes, law enforcement and policing, to courts, corrections and human services. Among other things, the Encyclopedia will: explicate philosophical foundations underpinning the U.S. system of justice; chart changing patterns in criminal activity and subsequent effects on legal responses; identify major periods in the development of the U.S. system of criminal justice; and explore evolving debates and conflicts on how best to address issues of crime and punishment. Its signed entries provide the historical context for students to better understand contemporary criminological debates and the contemporary shape of the U.S. system of law and justice. Key themes include:

- evolving constructions of criminality
- changing patterns of crime and criminal activity
- police training and the professionalization of law enforcement courts
- changing conceptions of prisons and corrections (punishment versus rehabilitation) and the evolution of penitentiaries
- major legislation and court cases
- biographies
- crime statistics across time
- organized crime in different time periods
- major periods in the development of the American system of criminal justice.

CYBERCRIME

Four-Volume Set

Edited by David Wall

Much has been written on the subject of cybercrime over the past two decades. This new major work brings together a selection of articles that cover the history, context and future of cybercrime, examining the relevant criminal behaviour, law and policing attached to its many forms. The set is divided into four volumes, ensuring a comprehensive spread of topics:

Volume One: History and Context; cybercriminals, victims, offenders and their motivations, law and policing, and cyber-security

Volume Two: Cybercrime against the machine; hacking, DDOS attacks and malicious software

Volume Three: Cybercrime using the machine; economic and deceptive crime such as fraud

Volume Four: Cybercrime in the machine; pornography, political hate speech and moral hate crime

Each volume opens with newly-written introductions that contextualize the articles and make clear the structure and rationale of the set. The result is a thorough and insightful collection of the key literature on cybercrime, making this a perennially valuable resource for scholars in the field.

ENCYCLOPEDIA OF WHITE-COLLAR AND CORPORATE CRIME

Second Edition

Edited by Lawrence M Salinger
Arkansas State University, USA

Since the first edition of the *Encyclopedia of White Collar and Corporate Crime* was produced in 2004, the number and severity of these crimes have risen to the level of calamity, so much so that many experts attribute the near-Depression of 2008 to white-collar malfeasance, namely crimes of greed and excess by bankers and financial institutions. Whether the perpetrators were prosecuted or not, white-collar and corporate crime came near to collapsing the U.S. economy. In the 7 years since the first edition was produced we have also seen the largest Ponzi scheme in history (Maddoff), an ecological disaster caused by British Petroleum and its subcontractors (Gulf Oil Spill), and U.S. Defense Department contractors operating like vigilantes in Iraq (Blackwater). White-collar criminals have been busy, and the **Second Edition** of this *Encyclopedia* captures what has been going on in the news and behind the scenes with new articles and updates to past articles.

ENCYCLOPEDIA OF VICTIMOLOGY AND CRIME PREVENTION

Edited by **Bonnie S Fisher** University of Cincinnati, USA, and **Steven P Lab** Bowling Green State University, USA

The fields of victimology and crime prevention have developed along parallel yet separate paths, and the literature on

both has been scattered across disciplines as varied as sociology, law and criminology, public health and medicine, political science and public policy, economics, psychology social work and more.

The *Encyclopedia of Victimology and Crime Prevention* brings together such diverse knowledge as it outlines and discusses the status of victims within the criminal justice system and topics of deterring and preventing victimization in the first place and responding to victims' needs.

In addition to standard entries, leading scholars in the field have contributed anchor essays that provide starting points for investigating the more salient victimology and crime prevention topics.

General topic areas covered include: interpersonal and domestic violence; child maltreatment and elder abuse; street violence; hate crimes and terrorism; treatment of victims by the media, courts, police and politicians; community response to crime victims; physical design for crime prevention; victims of non-violent crimes; deterrence and prevention; helping and counselling crime victims; and international and comparative perspectives.

ENCYCLOPEDIA OF TRAUMA

An Interdisciplinary Guide

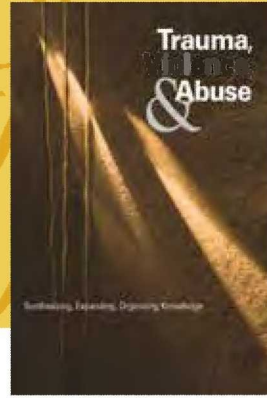

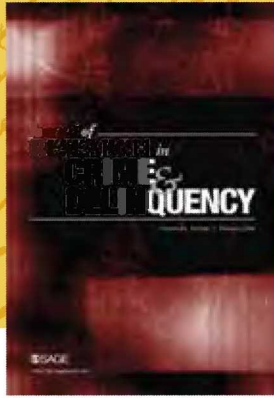

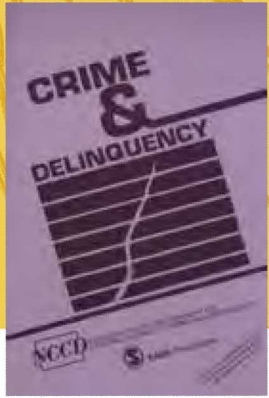

Edited by **Charles R Figley**
Traumatology Institute, Toronto, Ontario, Canada, and Tulane University

Trauma is defined as a sudden, potentially deadly experience, often leaving lasting, troubling memories. Traumatology (the study of trauma, its effects and methods

to modify effects) is exploding in terms of published works and expanding in terms of scope. Originally a narrow specialty within emergency medicine, the field now extends to trauma psychology, military psychiatry and behavioural health, post-traumatic stress and stress disorders, trauma social work, disaster mental health, and, most recently, the subfield of history and trauma, with sociohistorical examination of long-term effects and meanings of major traumas experienced by whole communities and nations, both natural (Pompeii, Hurricane Katrina) and man-made (the Holocaust, 9/11). One reason for this expansion involves important scientific breakthroughs in detecting the neurobiology of trauma that is connecting biology with human behaviour, which, in turn, is applicable to all fields involving human thought and response, including but not limited to psychiatry, medicine and the health sciences, the social and behavioural sciences, the humanities and law.

Researchers within these fields can contribute to a universal understanding of immediate and long-term consequences - both good and bad - of trauma, both for individuals and for broader communities and institutions. Trauma encyclopedias published to date all centre around psychological trauma and its emotional effects on the individual as a disabling or mental disorder requiring mental health services. This element is vital and has benefited from scientific and professional breakthroughs in theory, research and applications. This *Encyclopedia* covers this central element, but the expanded conceptualization includes the other disciplines and moves beyond the individual.

SAGE expands into digital archives with the acquisition of Adam Matthew!

We are delighted to announce that Adam Matthew is now a SAGE company.

Adam Matthew is an award-winning publisher of online primary source collections for the humanities and social sciences. Sourced from leading libraries and archives around the world, their truly unique research and teaching collections cover a wide range of subject areas from medieval family life to 20th century history, literature and culture.

With a growing portfolio that currently includes more than 52 interdisciplinary collections, Adam Matthew offers creative online resources for undergraduate and postgraduate students, researchers and academics.

Bringing to SAGE the knowledge and expertise of an acclaimed digital archive publisher, Adam Matthew has a strongly established reputation with the library community and a portfolio of high quality products that complements SAGE's offering.

Some of their best-selling titles include Empire Online; Mass Observation Online, and Foreign Office Files for China, 1949-1980.

What academics say about Adam Matthew collections:

Empire Online: "Empire Online has become an indispensable tool of research and teaching. It contains one of the most comprehensive collections of materials on the imperial experience available to us electronically" - *Professor Simon Gikandi, Princeton University*

Mass Observation: "A truly remarkable archive: the most intense and long-term attempt to chart mass/popular opinion in any country that I know of" - *Professor James Epstein, Vanderbilt University*

Foreign Office Files for China: "This is an immensely powerful resource for our understanding of the early Cold War era in China" - *Professor Rana Mitter, University of Oxford*
