Flash Drive Repair

J'aime

5 948 personnes aiment Flash Drive Repair.

### First You must extract your Flash disk information

- The first step of flash drive repair is determining your USB flash drive information to know which repair software will be suitable for this flash drive .
- To determine Flash drive information you can use many software such as ,Chip genius ,flash extractor , chip easy and many flash drive software but i prefer using Chip genius software .
- Now Bring your corrupted USB flash disk and Download Chip Genius from this link ["Chip Genius Software 2014"](#) ,connect your corrupted usb stick to your computer

### Popular Posts

[How to repair usb flash drive in three steps](#)[The full guide of Best USB flash drive repair software](#)[Best SD memory card format software](#)

- Open Chip Genius software and insert your USB pen drive , Once you connect the flash drive ,Chip genius will detect Flash information .Now the important parameters in the Chip genius report for us is three things :

[drive and memory card](#)

1. VID , PID
2. Chip Vendor
3. Chip Part-Number

- If the Chip genius detect the flash drive information correctly , You will get Chip vendor ,Chip Part- Number so we can repair the USB stick by Update firmware ,this means a software solution .But Sometimes Chip genius report doesn't show chip vendor ,chip part number or write unknown , in this way there is a hardware solution to make the flash drive recognized by computer and chip genius then use the software "we will discuss it after finishing the software part ".

Repair Corrupted USB Pen drive by Updating Flash Firmware "Software solution only "

- Now we start to repair flash drive .There are many ways to repair corrupted USB flash memory , i explain one of them before in this article "[How to repair usb flash drive in three steps](#) " ,this way i called it "VID-PID repairing method ".In this way after we get the Chip genius report for our flash disk ,we take the VID and The PID number and Go tho this site "[Flashboot.ru](#)" really i like this site , because it was my inspiring guide before , i learned a lot of things about repairing flash drives from it .

#### 1- VID-PID Flash drive Repairing Method

- Now open the link then write the VID ,PID in the boxes ,look to this picture
- Write VID and PID that you got before from Chip Genius report , then click Search .
- You will got a schedule of flash drive software with this parameters , we will need to focus in four parameters only from them "Chip Vendor ,Chip Model ,Size (GB) ,UTILS "Flash Firmware " .
- After we look to this Parameters and we found our flash drive information identical with chip genius report , Look to UTILs you will find the name of your correct flash drive repair software .Copy the Name of Flash drive repair utility then go to Our lovely Google Search engine and write the name of repair software and search about it .You will find a link to download the software from [Flash Drive repair website](#) or [Flashboot.ru](#) or any flash drive repair websites "The goal is to repair your usb flash disk , doesn't matter who is the website " .
- As example we find the software download link in Flashboot.ru ,look to the picture
- This is an example of phison chip vendor firmware software , to download it click on Phison\_MPALL\_V3.63\_PS2251-67.rar then download it directly to your computer .
- To repair USB flash disk , open the software then if the software is correct , you will find your flash in the software .Click in start to begin updating flash firmware .

## 2- Chip vendor -Chip Model Flash Drive repair Method

- This is a direct USB flash Drive repair Method .In this method we will search about the repair software directly on the net .
- From Chip Genius report ,Copy the chip vendor ,part number and paste them in Google search then enter .
- You will find many download links of your flash drive repair software ,choose the one identical to your words and download it .
- Open the downloaded repair software , insert your usb flash disk to your computer .If this is the right software , you will see your flash drive information in the software interface .Click start or format to begin formatting your corrupted usb flash disk .

## 3- General Best Flash drive repair software

There are many USB flash drive repair freeware software that maybe working and repairing your USB stick .Many Flash drive brand company develop a special software for it's flash memory.Also there is many general formatting and recovery software that can help you in fixing your flash disk .

### 3-1 Branded Flash drive repair Software

I will put the flash drive repair software for many famous USB flash disk ,I'm already explain them in special articles .

#### 3-1-1 Kingston USB flash Drive Repair Software

Kingston format utility

To repair Kingston USB Flash drive and download this tool ,Read this article

Repair any Kingston flash drive in one minute

#### 3-1-2 Kingmax USB Pen drive recovery Software

Kingmax Format tool

Dear Ashraf, thank you your site is very useful and interesting.  
If I perform the pid/vid method, will the usb drive be formatted or only the controller? If it will be erased, could I rescue files with sw as recuve, photorec, test disk &co.? Thank you, Marco

hi question to all.

can we still recover the old data from the USB stick after a factory reset (MP tools reformat)?

thank you.. please provide some insight, i need to recover some files from a stick which was reset successfully using MP tools. thank you

**ashraaf muhammed** August 26, 2014 at 5:21 PM

Recovering Data from corrupted USB after updating firmware isn't guaranteed but try to use Recuva software for free or you must go to Data recovery Company near to you, they will take money but u will recover your data

[Reply](#)

buhawi zum August 29, 2014 at 11:07 AM

Thank you Sir Asraaf for your response! i will try to use Recuva software if it can get the files from the usb stick.

I'm trying to recover some 2GB of documents from an 8-GB TDK "Life on Record" USB stick with SM3257 controller chip and a Sandisk flash memory chip. It was not detectable when it came to me, but I managed to make it work using SMI MP tools. I tried some recovery softwares but, no single file was found.

So I'm wondering if it is still technically possible to retrieve the files even after the MP tools (reset) having known that the reset have formatted the flash memory.

My friend , there is two chip vendor models so it must be one not two so please remove the cover of ur flash drive and write the words on

Anonymous September 6, 2014 at 1:28 AM

Sorry for the inconvenience, I found one small chip near to a led light:  
MW8209  
IPR360061-1  
A101H14C

And on the other side I found a bigger one:  
JAPAN  
TY9000A000AMGF  
K363800122KAD

I hope you can help me to solve this problem!!

ashraaf muhammed September 6, 2014 at 10:32 PM

you can use the software here sir >>> <http://www.flashdrive-repair.com/2013/11/Update-Ameco-MW8209-firmware-and-fix-corrupted-flash-drive.html>

Dear Ashraaf Muhammed, could you help me?! I don't know what to do

ashraaf muhammed September 10, 2014 at 4:25 PM

use software in this article and tell me the result >>>  
<http://www.flashdrive-repair.com/2013/11/Update-Ameco-MW8209-firmware-and-fix-corrupted-flash-drive.html>

Anonymous September 10, 2014 at 4:56 PM

I put the pendrive, open UdTools and go to Start All after a couple of seconds I get the same message : "Error! can not find the chip information! ID=0000000"

Any idea?

Anonymous September 11, 2014 at 4:29 AM

Finnally...I download the version 1.1.1.4 of UdTools for MW8209 and the software recognized the pendrive. Sadly this message appear:

Error: Download Scan Code Failed! ID=9879A5C0 Elapse= 8s

My friend...I know we are close to solve it. I need your advice!! Thanks in advance!!

ashraaf muhammed September 11, 2014 at 11:03 AM

try this version my friend >> <http://adf.ly/rxiNH>

Reply

zae segaff September 20, 2014 at 1:04 PM

dear admin.

Hi I try to repair my flash disk but still no luck.

Here is my chip genius info:

Description: [I:]USB Mass Storage Device(Generic Flash Disk)  
Device Type: Mass Storage Device

Protocol Version: USB 2.00

Current Speed: High Speed

Max Current: 100mA

USB Device ID: VID = 0011 PID = 7788

Serial Number: 5374E82F

Device Vendor: Generic

Device Name: Mass Storage

Device Revision: 0103

Manufacturer: Generic  
Product Model: Flash Disk  
Product Revision: 8.00

Chip Vendor: Alcor Micro  
Chip Part-Number: Unknown(??) - 0xE603 - F/W D823  
Flash ID code: 98DE9892 - Toshiba - 1CE/Single Channel [TLC] -> Total Capacity = 8GB  
Reference Product: ???:?U?????????

Tools on web: <http://dl.mydigit.net/special/up/alcor.html>

And, you sad because it has unknown chip-part number then I need to see code inside the chip. Then I open my flash disk and I got this number:

SC908AN-H  
A623507-11F  
12512H20

And this is the pict, CMIIW if I wrong about those code: <http://s21.postimg.org/wrkxtvyyf/intel.jpg>

thank you

My usb (8Gb) is a USM 8GU from sony

There is my data from easy chip :

Logical drive : F:\ Capacity: 0.0G  
Device ID : VID = 1F75 PID = 0916  
Device SN :  
Device version : 1.00

Device model : NAND Flash

Protocol : USB2.0

Max power : 200mA

Partition type : Device active :

Aligned state : Misaligned

Controller : Chipsbank

Controller model: CBMnnostor

FW Date : NAND.la.

I really need your help please, because i can't find the right utils for my usb and i really need my data =/

ashraaf muhammed October 7, 2014 at 2:08 AM

i can't determine the actual chip vendor for ur flash , please remove the cover and write the info on the small processor

DeathTemplar1 October 7, 2014 at 2:53 AM

I don't know how to open it =/

(<http://img12.360buyimg.com/n1/g10/M00/0E/0C/rBEQWFFQGqIIAAAAADPOU9oKAAAACzyQC1tYEAAM9R150.jpg>)

I will try to force it tomorrow if i didn't see an other way .

P.s: i try to use Chip genius to see if that give me more information, i don't know if that will help =/ :

Device Vendor: Innostor Technology Corp.

Device Name: IS916EN

Device Revision: 0001

Manufacturer: Innostor

Product Model: NAND Flash

Product Revision: 1.00

Chip Vendor: Innostor(??)

Chip Part-Number: IS916

Thank you very much for taking your time to help me.

ashraaf muhammed October 7, 2014 at 3:04 AM

try this software and please tell me the result with u >> <http://goo.gl/KAS7bW>

I have to sleep now so if i don't reply to u this means that already slept  
So tomorrow will communicate with u asap

ashraaf muhammed October 7, 2014 at 3:07 AM

also try this >> <http://goo.gl/WYDD2F> and this >> <http://goo.gl/6D8hFZ>

DeathTemplar1 October 7, 2014 at 3:44 AM

The last one had worked, but all my data had disappear =/, i'm trying wondershare data recover but it's look like he can't even had anything ( i'm going to try some other maybe one of those software can save me)

But still, thanks you a lot, in a way I had a new usb, i will not do the same mistake. Just a strange things that my usb is now called Transcend and not sony but it's not a really big deal ^^.

Thanks you very much. And get a good night

ashraaf muhammed October 7, 2014 at 3:35 PM

I'm so sorry , i don't know that u have important data on ur usb , but u know it's corrupted so if u fix it u lose data inside it so i'm really sorry .by the way congratulation for ur new usb

DeathTemplar1 October 7, 2014 at 6:31 PM

That's not your bad ^^; it was mine, if i had been a bit more carefull with my data (i mean by that keep a copy on my computer), and if i had not panic on my usb when the first problem comes, I would still have my data. That make me a lot sad, because i looe many important thing, but i had passed too much time on it already and being helped to finally finish it relieves me of some ways, at least now I know that I can't do anything more.

And I didn't lose eveyrthing i know someone who had some copy of a part of my stuff, and it's better than anything.

But anyway, thank you very much for helping me, and sorry for taking your time.

Max Current: 100mA

USB Device ID: VID = 0951 PID = 1665

Serial Number: 60A44C413CE6FD80E99023C9

Device Vendor: Kingston

Device Name: DataTraveler 2.0

Device Revision: 0100

Manufacturer: Kingston

Product Model: DataTraveler 2.0

Product Revision: 1.00

Controller Vendor: Solid State Systems

Controller Part Number: Unknown(??) - 0xRR

Tools on web: <http://dl.mydigit.net/special/up/sss.html>

I opened the USB Drive:

These are the number i got off the chip on the drive:

AVNG4F7

1330

115T07LF-3S-1

1325-01

DL94V-0

2024415-001-A00

ON another part i found this number:

6698

H1-UBC

PF065-100B

1322

Kindly help me. Hope these numbers will help you help me. Thanks. Keep up the good work you are doing.

In deed this controller haven't any firmware yet , you can search about SSS6698 firmware and you will not find anything .Sorry for that my friend

Roberto Mai October 29, 2014 at 11:20 AM

Thanks for the help will keep you posted if i find any help. There are many people with the same types of drive that are looking for help. God Bless.

[Reply](#) Kerby Barros November 18, 2014 at 9:51 PM

By now resulted but my pendrive is 32gb and after the recovery jetflash tool came with 27 gb  
tomorrow, if give some error I say

[Reply](#)[Replies](#)

ashraaf muhammed November 19, 2014 at 4:20 AM

I hope u r satisfied with this result , you know there is some bad sectors in ur flash so maybe u will not recover all 32 gb and 27 gb is pretty good better than nothing if u agree with me

Hi, I found your post very useful and interesting. Please help me to find the correct tool to recover my 8GB usb flash drive as ChipGenius is not getting chip vendor nor chip.part number. I've opened the case and the info on the controller chip is the following:

SC908ANHL  
H3R222 . 1DOF  
1212T9C2

Please let me know should you need a pic of that info. Thank you

Use this my friend and tell me the result >> <http://adf.ly/ugeQ5>

Anonymous November 28, 2014 at 6:48 AM

thank you for your answer. I tried another version of chipgenius and it returned that the chip vendor is alcor micro, however when using the AlcorMP tool as you suggested, the tool is not recognizing the flash drive and it cannot start the process. Do you have any idea how to get this thing working?

Chip Genius Software didn't find VID, PID, Chip Vendor Chip and Part-Number.  
what can i do now?

my problem is: when i insert my usb in usb-port, only a cd-driver opens. there is  
no usb-driver which i can open.
