Bosch Washing machine replace rubber door seal?

Thank You so much Guy's for sharing your experiences ,if You had kept your knowledge to yourselves I would not have been able to complete this task today.Thank God for the internet.I purchased a replacement rubber door seal via a websit,it arrived via Royal Mail.

Search engine on internet,found this site.Read instructions.

Thank You for recommending removing front panel,first snag,screwdriver,I have star and flat.These new screw heads are alien.Walk down town to purchase a new design of driver,Halfords,cheap £10 pack of multiple driver heads.

Home,Wife removes soap powder tray,so I can gain access to panel screws.

I will not cover the material already posted on here.Just my tips.

Pulling off the springs,first spring pull hard as already mentioned.Second spring,2 pliers onto spring to pull off.

Replacing technique,to get rubber onto white drum,Baby oil to lubricate,smeared baby oil on with tissue.

Replacing

Inner(nearest to drum) spring,first spring to be reset,2 secure spring at bottom of the loop in the groove first,now tension at top of loop,(Pulling two ends of spring to meet up)the tough step,I used 2 flat (Old fashioned)screw drivers between

rubber and spring acting as levers. Slid the taught spring over screw driver levers into slot.

Bwanatickey
March 2010

Good instructions guys. Front panel deffo off on the WFL2063 then it's a dawdle. Prize of the outer retaining ring then pull the seal off its recess. Three screws inside top drawer, one screw locating the bottom panel then slide to right to remove, two further screws locating the bottom of the front panel, up top and the wee countersunk screw round the corner at top right which allows the control to move a bit to ease the removal of the front panel. pull off the plug for the door switch and remove trunking and/or wires from the panel. There is a spring holding the inner part of the seal so prise that away and the seal will then pull off its inner lip. Clean round the lip before you fit the new seal and refitting is a reversal of removal. Total time start to finish was 30 minutes and that was a first for me so the job isn't difficult. Tools required are a couple of Torx screwdrivers and strong fingers.

Jimmy Simpson
February 2010

Hi,
Thanks for all the advice given. Just finished changing the seal. My advice is to take the front of the machine off - three screws around the soap dispenser, two on the side and one at the bottom (inside the drain door) - then its simple to fit the seal to the drum. To fit the spring outer ring you will need an extra pair of hands or lots of patience. I got nowhere for 2 hours, then decided to take the front panel off and the wife helped with the spring - all done 10 mins. Hotpoints are much easier!

John
January 2010

Bosch Maxx5 1400 - having just completed this job it is quite straight forward, read all the other writers tips before starting.

The tricky bit is connecting the rubber seal to the White plastic drum, which you should do along with its spring before you connect the seal to the outer panel. There's a real knack to this but it can be done with a little practice with one hand by pushing the seal onto the drum with your thumb then easing the rubber up over the rim again with your thumb, working your way round the drum - I used a little fluid to lubricate the rubber which helped with the inner seal but made the outer seal keep slipping off when I tried to get the spring on, so I had to dry it before successfully completing the task. Connecting the springs (Inner & Outer) around the gasket/rubber seal is so much easier with an extra pair of hands. Do take Photos as advised by a previous writer - they are invaluable! I took one at each step of removing the old gasket/seal showing how it was connected. and did have to refer to two of them when putting the new gasket/seal on. God Luck.

KennyBoy
October 2009

I've just seen the previous question about how to get the back spring off. That's easy. Just pull the old seal off the plastic drum and the spring will come off with it. You may have to exert some force, but there's no risk that you'll damage anything. Even if you split the old seal (which you're unlikely to) it doesn't matter because you're going to throw it away!

Geoff
October 2009

I have just watched a professional do this job on an Exxcel Express 1200 WFO2465GB having failed (but see below) to do the job myself. First of all, it's possible to fit a new seal without taking the front panel off, but you're crazy to try. The panel comes off easily enough; all the screws are on the front of the machine, and you don't need to turn it on its side or anything. There's a small pipe that needs to be unclipped/refitted to the seal on this model, just to the left of centre at the top. The small drain holes in the seal should be centred at the bottom. Follow the instructions about fitting the seal to the white plastic drum in the previous answer, but don't fall into the trap I fell into and think that the lip of the seal needs to go into the gap between the plastic drum and the spinning metal drum. Unlike some other washing machines, on this model the lip of the seal lies INSIDE the inner drum. My advice is to take careful note of how the old seal fits before you take it off. Take a photo if you like; I wish I had!

After that it's easy; just follow the previous instructions. Overall, I'd rate this as quite an easy job once you have made the sensible decision to remove the front panel, and have understood where the lip of the seal is supposed to lie. As I've explained, I actually managed to do the hard part without taking the front panel off, and nearly broke my fingers in the process. After that, I misunderstood what I had to do (or rather not to do), gave up the struggle, and called a local firm to complete the job.

How to fix my leaking gw709nz smart drive? hi there I need urgent help I have a fisher n paykel gw709nz and it's leaking badly not sure were from but I'm pretty sure it's not the taps as they have a good seal on them and they seem dry while there's a massive puddle on the floor. What could be wrong and how do I fix please. Click here for the answer

Simpson encuro 702 7kg washing machine? The water does not shut off when you are filling up. Click here for the answer

Bendix B/w 104w washing machine? Sorry this is another enquiry about this model Bendix washing machine. Does anyone know if this model heats its own or does this need to be used in conjunction with my immersion heater to heat the water to say 40 degree 60 degree washes. Many thanks and any input would be very much appreciated. Click here for the answer

Defu Automaid 600? The problem started occurring about 6 weeks ago. The machine is two years old: The washing machine does not empty the contents of the container for fabric softener. At the end of the cycle the contents is still all there. I prefer using vinegar or course salt, but even commercial softener has rema. [Click here for the answer](#)

Hotpoint WML540 won't start? Hi, washing machine has been working fine, but now when you pres the start button (slow blinking amber light) it goes to green, clicks 6 times the back to blinking amber; also door lock is lit red & the "end" light above is dimly & slowly flashing red. The on/ off button has no effect so I swit. [Click here for the answer](#)

Hoptpoint Aquarius WF101 Lights flashing? When plugged in, all panel lights flash. The start button does not work, (and so wash cycle cannot start) and neither does the on/off button. The lights will only go off when I unplug the machine. The machine has been stored, and unused for nearly a year - could this be a reason? It was working pe. [Click here for the answer](#)

Where can I find concrete block in my washing machine? Zanussi 6kg 1200rpm? The machine makes a loud thumping sound and judders hard forwards about a foot while kicking into spin then stops during the spin. Sometimes does the same when ending spin. Thought might be concrete block. Don't know where to find it. Or maybe problem is something else. [Click here for the answer](#)

water in dispenser? when the wash has finished the softener draw is full of water and clothes do not smell of softener.

Samsung WF70F5E reviews and prices: Freestanding 7kg capacity washing machine

This refers to where you can load the washing into the machine. Front loading is when the door is on the front of the machine and top loading is when you put washing in through an opening at the top of the machine.

When purchasing a top loading machine, make sure you have enough room to open the hatch (top loading machines cannot be placed under a worktop). When looking for front loading machines, take note of which way the door opens so that you can make sure you have enough room to take washing in and out of the machine.

The more efficient the product, the less energy it needs and the more you get for your money. $\text{D}^2\text{D}, \hat{\text{A}} \sim \text{A} \text{D}^2\text{D}, \hat{\text{a}}, \text{c}$ rated products are the most efficient and $\text{D}^2\text{D}, \hat{\text{A}} \sim \text{G} \text{D}^2\text{D}, \hat{\text{a}}, \text{c}$ rated products are the least efficient.

Also known as: Samsung WF70F5E0W2W, Samsung WF70F5EOW2W, Samsung Wf70f5e5p4w, SAMSUNG WF70F5E0N4W

Manufacturer's Description

The Samsung ecobubble WF70F5E Washing Machine combines the latest washing technologies with sharp and sophisticated design to make your laundry tasks a breeze.

Capacious washing

Featuring a 7 kg load capacity, you can be sure that the Samsung WF70F5E will have room to accommodate your household's laundry with the minimum number of loads.

Capable of reaching an impressive 1400 rpm spin speed, the chore of having to hang up dripping washing over the bath will be a thing of the past.

A machine with an eco-friendly conscience

The Samsung WF70F5E boasts an impressive A+++ rating for energy efficiency thanks to the eco-bubble technology, which froths the detergent with air and water before the cycle starts to generate small bubbles which penetrate fabrics more rapidly. The result is a cool wash which is as effective as a warm wash, saving you up to 70% on energy when compared to a less efficient washing machine.

A whole host of programmes

The Samsung WF70F5E Washing Machine features a plethora of washing programmes allowing the selection of the most appropriate option to suit each laundry load.

If time is of the essence the Quick Wash program will get the job done with minimum hassle, and for delicate or sensitive skin, the Baby Care programme will minimise the detergent residues in the fabric.

With the Smart Check feature you can also solve problems with your machine using your smartphone, which guides you through fixing your washing machine.

Transform the hum-drum chore of washing into a no-hassle dream with the Samsung ecobubble WF70F5E Washing Machine.

BOSH AXXIS Washer Machine Insane Brutal Spinning Sounds Like A Jet Plane

ĐŽĐžŃfĐ±Đ»Đ,Đ°Đ³⁄₄Đ²Đ°Đ¹⁄₂Đ³⁄₄: 19 Đ,ŃŽĐ¹⁄₂. 2013 Đ³.

This is a very powerful machine. The Bosh Axxis dryer also is installed on the top. This washer sounds like a jet plane and the maximum spin is extremely powerful, able to leave the clothes almost dry. What you see is what happens when the washer is not installed correctly. If the washer is not leveled properly, this is what happens. Also remove any piece in the base which can cause some unevenness. This washer is great but must be installed properly, or it will cause an earthquake in your home, even with the softer spin cycles.
